

## **Financial and Technical Support**

The Regional Center Partnership receives financial support from the Somerset County Board Chosen Freeholders and the three Regional Center municipalities. Technical and administrative assistance is provided by the Somerset County Planning Board. The Regional Center Partnership's public, private and institutional sector representatives provide the critical leadership and input needed to prioritize and allocate resources to achieve the goals of the Regional Center.

This process presents an excellent example of how the public and private sectors can work together to address community revitalization, quality of life issues, regional planning, and implementation of goals, objectives and concepts outlined in the State Development and Redevelopment Plan.
